Manish Tiwari

SOC Analyst | Threat Detection, SIEM & Incident Response

Gurugram, Haryana, India

+91 9311822647 | tiwarimanish2810@gmail.com | linkedin.com/in/manish-tiwarisec | github.com/yfwmaniish

Summary

SOC-focused security analyst with hands-on experience in threat intelligence, SIEM monitoring, and log/evidence analysis across defence, law-enforcement, and enterprise environments. Built a Wazuh SIEM lab with ATT&CK-mapped attack simulation and a dark-web threat-intelligence platform. RHCSA-certified, with research on adversarial ML for intrusion detection.

Education

GD Goenka University **2023 – 2027 (Expected)**

Bachelor of Technology in Computer Science ***(CGPA: 9.4)*** *India*

Experience

Research Centre Imarat (RCI), DRDO **Aug 2026 – Nov 2026**

Cybersecurity Research Intern | Onsite *Hyderabad, India*

- Contributing to a confidential cybersecurity research project at a DRDO defence R&D laboratory; project specifics are restricted under Government of India confidentiality requirements.

Special Task Force, Haryana Police **Jul 2025 – Feb 2026**

Cybersecurity Research Associate | Onsite *Haryana, India*

- Built and operated **SDRMS**, a centralized platform for log, digital-evidence, and incident-record analysis, cutting evidence-retrieval time by consolidating 4TB of datasets/log sources into one searchable system.
- Supported centralized intelligence tracking and case correlation for law-enforcement operations, structuring evidence and log records from multiple investigative systems for faster triage.

IBM **Jun 2024 – Aug 2024**

Cybersecurity Intern | Remote

- Identified and documented 12 endpoint security vulnerabilities across 4 environments and supported remediation, reducing the endpoint attack surface.
- Developed **Trikaal**, a secure internal file-sharing application enforcing role-based access control across 50+ users to reduce unauthorized-data-exposure risk.

Projects

Wazuh SOC Lab | *Wazuh, Filebeat, DFIR-IRIS, Atomic Red Team*

- Deployed Wazuh SIEM monitoring Windows and Ubuntu endpoints via agents, with Filebeat log shipping and alert forwarding into DFIR-IRIS for case management.
- Simulated adversary techniques with Atomic Red Team and custom attack scripts, triaging the resulting alerts against MITRE ATT&CK.

Trinetra | *Threat Intelligence, OSINT*

- Built a dark-web threat-intelligence system that monitors underground forums via OSINT and data correlation, surfacing 20+ data leaks exposing Indian Aadhaar and PAN (PII) records for proactive threat detection.

AdverSim-IDS | *Adversarial ML, Network Intrusion Detection*

- Built a constraint-aware framework to test adversarial robustness of ML-based network intrusion detection (github.com/yfwmaniish/adversim-ids); basis of two research papers.

Automated VAPT Tool | *Python, Nmap, OWASP*

- Built an automated assessment tool chaining recon and vulnerability scanning across web and network targets, demonstrating attacker methodology that informs detection and hardening.

Publications & Patents

M. Tiwari, Y. Kumar, R. Sharma. *Adversarial Vulnerability in Machine-Learning-Based Network Intrusion Detection: The Role of Feature Controllability and Identity.* Under review, 2026.

M. Tiwari et al. *Iterated Feature Ablation as a Defence for ML-Based Network Intrusion Detection* (working title). In preparation.

Inventor: *An Extraction Apparatus and a Process for Production of Aromatic Compounds Thereof*, Indian Patent Application No. **202611060571** (Published 17/07/2026)

Leadership & Achievements

6x Hackathon Winner • Founding Board Member, NCREEPS • Judge, Anveshna • Founder, Veltro • PR Head, Avishkar • General Secretary, Lucid Vista

Technical Skills

SIEM & Detection: Wazuh, ELK Stack, DFIR-IRIS, Splunk (learning), MITRE ATT&CK, log analysis, alert triage
Threat Intel & Offensive Tools: MISP, VirusTotal, Maltego, Shodan, theHarvester, Nmap, Burp Suite, Metasploit, SQLmap
Languages & Platforms: Python, Bash, SQL, PowerShell, Linux, Docker, Git, Flask
Certifications: RHCSA (EX200), RH124, RH134, CompTIA Security+ (in progress), CEH v13 (in progress)
